Research Background & Areas of Interest:	<p>My research program during my MSc postgraduate work was centered on preparing & testing herbal compounds as pharmaceutical agent to be used as paste for treatment of recurrent aphthous ulceration. Also, My research program during my PhD postgraduate work was centered on Poisoning and clinical toxicology (i.e. Pharmacoepidemiological, Clinical and New Toxicological Aspects Associated with Acetaminophen Overdose, and Predictors of Poisoning-Related Outcomes”.</p> <p>My current researches include issues in drug information services; poisoning and clinical toxicology, Medication counseling and compliance, community pharmacy practice-pharmacy intervention, developing pharmaceutical care tools; Pharmacotherapeutics in critical care patients; drug utilization; drug usage evaluation; and quality assurance. The main objective of these works is to check the quality of local health care produced by health provider & send recommendations about the result for the good pharmacy practices in concern.</p>
